Scilab Functions	Matlab Functions	C++ Functions	Description
<u>bezoutd.sci</u>	<u>bezoutd.m</u>		Solve Bezout equation: $P=AS_oH_s+BR_oH_r$
<u>cont2disc.sci</u>	<u>cont2disc.m</u>		<i>z transform</i> : $F(s) \rightarrow F(z)$ with zero order hold (zoh)
<u>fd2pol.sci</u>	<u>fd2pol.m</u>		Compute discrete time 2nd order from the natural frequency and damping of a continuous time 2nd order
<u>omega_dmp.sci</u>	<u>omega_dmp.m</u>		Compute natural frequency and damping of a continuous time 2nd order from the rise time and the overshoot
<u>predisol.sci</u>	<u>predisol.m</u>		Solve predictor equation
<u>nyquist_ol.sci</u>	<u>nyquist_ol.m</u>		Compute Nyquist plot
<u>filter22.sci</u>	<u>filter22.m</u>		Compute a narrow band resonant filter (zeros/poles)
	<u>ppmaster.m</u>		Design of digital controllers by pole placement with sensitivity shaping
<u>estorderls.sci</u>	<u>estorderls.m</u>		Complexity estimation using least squares criterion
<u>estorderviv.sci</u>	<u>estorderiv.m</u>		Complexity estimation using an instrumental variable
<u>nrls.sci</u>	<u>nrls.m</u>		Non recursive least squares
<u>rls.sci</u>	<u>rls.m</u>		Recursive least squares
<u>rels.sci</u>	<u>rels.m</u>		Extended least squares(recursive)
<u>oloe.sci</u>	<u>oloe.m</u>		Output error (recursive)
<u>foloe.sci</u>	<u>foloe.m</u>		Output error with filtered observations
<u>afoloe.sci</u>	<u>afoloe.m</u>		Output error with adaptive filtering of the observations
<u>xoloe.sci</u>	<u>xoloe.m</u>		Output error with extended prediction model
<u>vi_maux.sci</u>	<u>vi_maux.m</u>		Instrumental variable with auxiliary model
	<u>udrls.m</u>		U-D factorized recursive least squares
	<u>olvalid.m</u>		Open loop model validation
	<u>clid.zip</u>		Closed loop identification toolbox
	<u>reduc.zip</u>		Controller reduction toolbox
	<u>prbs.m</u>	<u>prbs.c</u>	Pseudo random binary sequence generation
		<u>rst.c</u>	RST controller algorithm
